

SERIAL NUMBER (7 DIGITS) CKL	PERSON NO.	NDNS NHS (A)	
National Diet and Nutrition Survey (NDNS)			

NHS Central Register and Cancer Register (Adults 16+)

- The NHS Central Register lists all the people in the country and their National Health Service (NHS) number.
- We would like to ask for your consent for us to send your name, address and date of birth to the National Health Service Central Register. A marker will be put against your name to show that you took part in the National Diet and Nutrition Survey.
- If a person who took part in the National Diet and Nutrition Survey gets cancer, or dies, the type of cancer or cause of death will be linked with their answers to the survey. By linking this information the research is more useful as we can look at how people's lifestyle can have an impact on their future health.
- This information will be confidential and used for research purposes only.
- By signing this form you are only giving permission for the linking of this information to routine administrative data and nothing else. We will not be able to obtain any other details from your medical records.
- You can cancel this permission at any time in the future by writing to us at the following address: National Centre for Social Research, 35 Northampton Square, London EC1V 0AX

Your consent	
date of birth to the National I	consent to the NDNS team passing my name, address and lealth Service Central Register. I understand that information held by the NHS d to follow up my health status.
Signed	

I understand that these details will be used for research purposes only.

Sample Details

			dd/mm/yyyy 24hr clock	cle as appropriate			
Sample Tube			Tests	Lab order	Lab barcode	Lab processing	
Serum SEN1 brown	Full	circle as	Creatinine CRP Lipid Profile		BIOCHEM BARCODE	Automation rack	
	Partial	appropriate	TSH Free T4 Free T3	CP952	EDTA sample must be labelled with both	Automation rack	
EDTA	Full	circle as Red Cell Folate			biochem&haem barcodes	Pass to Endo Staff for division of EDTA	
EN1 red	Partial	appropriate	FBC	HA952	HAEM BARCODE	- instructions below	

EDTA separation

Depending on sample volume split the whole blood in the following priority

FBC

Minimum volume required is 1ml – there will be three options:

- Volume less than 1ml (e.g. partial sample) proceed to folate aliquoting and add Meditech comment HAZINS against the haem barcode
- Volume very close to 1ml send primary tube to Haem with the pink duplicate request form, add Meditech comment CCOM and free text against the biochem barcode
- Volume more than ~1.7ml proceed to aliquoting whole blood for folate then primary tube to Haem with the pink duplicate request form

Folate

Take 2x 2ml tubes of ascorbic acid from the bottom half of the -80°C Protect freezer and defrost. Each contains 1ml ascorbic acid – check it has not expired.

Print patient biochem barcodes (screen 66)

Label 2x defrosted 2ml ascorbic acid tubes with HNR barcode labels (FOL1 & FOL2) supplied in the delivery pack, then label with patient biochem barcodes. DO NOT COVER HNR BARCODE WITH BIOCHEM BARCODE

Invert the primary EDTA tube a few times to re-suspend the contents

Transfer exactly 100µl from primary EDTA tube into each tube containing 1ml ascorbic acid and invert to mix Store in the -80°C Protect freezer

If there is sufficient volume proceed to aliquoting whole blood for A1c

If there is insufficient volume left for A1c add a Meditech comment CCOM and free text against the biochem barcode

HbA1c

Label 1x 2ml secondary tube with patient biochem barcode and write A1c Invert the primary EDTA tube a few times to re-suspend the contents

Transfer 0.5ml from primary EDTA tube into secondary tube

Place secondary tube in A1c skip in office

		24 hr clock			<u> </u>						
В.	Time of arrival		:								
C.	Complete table belo	w:									
	Samples expected:		San recei		Volume receiv'd?		tubes aged?				
	, .		Yes	No	mls	Yes	No				

Samples expected:	received?		receiv'd?	damaged?		
	Yes	No	mls	Yes	No	
LiHep 1 (Orange Top) 7.5ml (LHN1)						
LiHep 2 (Orange Top) 2.7ml (LHN2)						
Plain Serum (White top) 4.5ml (SEN2)						
Fluoride (Yellow top) 1.2ml (FN1)						

D. Centrifuge tubes as described in the protocol and then complete the following table:

Sample	Time tube centrifuged		sample rmal?	If abnormal, code reason	
	(24hr clock)	Yes	No	(enter code from list)	
LHN1	:				
LHN2	:				
SEN2	:				
FN1	:				

Code frame for abnormal samples:

- 1 = Haemolysed
- 2 = Turbid
- 3 = Lipemic
- 4 = Frozen
- 5 = Clot Present
- (EDTA/LiHep only)
 6 = Entirely clotted
- (EDTA/LiHep only) **7** = Not Clotted
- (plain serum only)
 8 = Other (please describe
 overleaf)

Please complete table:				
Sample	Required Vol (μl)	Actual Vol(μl)	Time of aliquoting	Time of entry into freezer
LH1	600			
LH2	800			
LHVC	300			
LH3	800			
LH4	300			
LH5	200			
LH6	500			
LH7	300			
SE1	600			
SE2	600			
SE3	600			
F1	500			
LHN1 washed RBCs	N/A	N/A	N/A	
LHN2 washed RBCs	N/A	N/A	N/A	
If plasma from either of the and the haemolysed plasm (trace metal monovette) to note in the table above. Record temperature sam	a to fill the remai fill LH4. If you ha	ning tubes. Buve to use LHN	ut always use LiHe	p plasma from LHN

Го be com	pleted by t	the nurse					
Nurse Name			Nurse Number]
	espondent etails	Please affix seria number label he Label UDESP(3	re				
Please	e complete on	e record for each res	spondent.				
Q1	Did the respon	ndent consent to takin	g PABA tablets?				
	Yes						
Q2	Did the respon	ndent keep the PABA	tablet packaging?				
	Yes	Send the packaging provided	, including any rer	maining tal	olets, to H	NR in the բ	ostal pack
	No						
Q3	Did the respon	ndent consent to the s	torage of any rem	aining urin	ie?		
	Yes No						
Q4	Was there any	y urine inside the 2L b	ottle?				
	Yes	Weigh BOTH the 2L possible) to sub sam weights at Q6 .	•	•		0 0	•
	No	Weigh the 5L bottle of	only. Record weigh	nts below ((Q5).		
Q5	Type of conta	ainer: 5.0L jo	erry can				
•	_	ne a first time , on the e containing the urine:	-	vided, and	record the	e weight in	kilograms
		kg					
•	Weigh the uring the urine:	ne a second time and	I record the weigh	t in kilogra	ams of the	e 5L bottle	containing
		Ka					

	If the first and second weights differ by more than 0.02kg weigh the urine a third time and record the weight in kilograms of the 5L bottle containing the urine:
	kg
	If no urine in 2L bottle: mix the urine and take 4 sub-samples and discard the remaining urine and equipment as per instructions provided. If any urine in 2L bottle: go to Q6.
	Type of container: 2.0L jerry can
•	Weigh the urine a first time , on the digital scales provided, and record the weight in kilograms of the 2L bottle containing the urine:
	kg
	Weigh the urine a second time and record the weight in kilograms of the 2L bottle containing the urine:
	kg
	If the first and second weights differ by more than 0.02kg weigh the urine a third time and record the weight in kilograms of the 2L bottle containing the urine:
	kg
	Can all urine in the 2L bottle be transferred into the 5L bottle?
	Yes Go to Q8
	No Go to Q9
	Weigh first, then transfer urine from 2L bottle to 5L bottle. Mix urine before sub-sampling from 5L bottle only : mix the urine and take 4 sub-samples and discard the remaining urine and equipment as per instructions provided.
	If urine collected in 2L bottle will not fit in 5L bottle, do not transfer. Note the weight of the 2L bottle above but only sub-sample from 5L bottle: mix the urine and take 4 sub-samples and discard the remaining urine and equipment as per instructions provided.

Please use the packaging provided to send the following items to HNR:

- one copy of the respondent 24-hour urine collection sheet
- the completed urine volume and dispatch sheet
- and the urine sub-samples

Please post the packet of samples as soon as possible in a post-box; check for same day collection.
